ternal signs of Cancer until the blood is polluted and the system thoroughly contaminated by this desaily virulent poison.

Then a size or ulcer appears on some part of the body; it may be small and harmless looking at first, but as the cancerous cells form and are deposited by the blood near the sore, it increases in size and severally, with sharp shooting pains. No matter how often the sore is removed by the surgeon's knife or flesh destroying plasters, another comes and is worse. The real disease is in the blood, and the treal ment must begin there. The poisoned blood must be invigorated and purified, and when this is done cancerous cells can no longer form and the sore will cells can no longer form and the sore will heal naturally and permanently.
